DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 14-26 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The steps of claims 14-26 consist solely of a program and *mathematical algorithms* that do not produce a tangible result. Please note that the claims are directed merely to "determining" and "calculating" steps without positively reciting the tangible output. The language of claims 14-26 is directed merely to an abstract idea that is not tied to a technological art, environment, or machine which would result in a practical application producing a concrete, useful, and tangible result to form the basis of statutory subject matter under 35 U.S.C. 101. Merely determining or calculating steps is too preliminary to permit one of ordinary skill to realize any usefulness in the technological arts.
